

**DESCRIPTION:** BASALITE CEMENT is a pre-blended mix of Type GU Portland cement and flyash. BASALITE CEMENT is suitable for any concrete construction, especially where type 20 cement and/or increased sulphate resistance is specified. The material requires only the addition of aggregate and potable water.

---

**USES:** BASALITE CEMENT is recommended for general concrete construction or repair and is also ideal for priming concrete pumps.

---

**ADVANTAGES:** BASALITE CEMENT's advantages include:

- increased ultimate compression strength
- increased workability
- increased durability
- decreased permeability
- reduced potential for sulphate attack
- reduced heat of hydration

---

**TECHNICAL DATA:** BASALITE CEMENT meets CAN CSA A362-M90 and ASTM C-595-86 for Type GU Portland - Pozzolan Cement.

---

**PACKAGING:** BASALITE CEMENT is packaged in 25 kg (55 lb.) triple-lined paper bags.

All Basalite Dry Mix can be custom-packaged to suit specific project requirements.

---

**SAFETY PRECAUTIONS:** BASALITE CEMENT contains Portland cement and flyash. Normal safety wear such as rubber gloves, dust masks and safety glasses, used to handle conventional cement-based products, should be worn. Material Safety Data Sheets are available upon request.

Liability for damages or defective goods shall be limited to the refund of the purchase price or product replacement.
