

DESCRIPTION: ENVIRO-GRIT is a non WHMIS controlled abrasive sand made from recycled glass.

USES: ENVIRO-GRIT is the environmentally friendly choice for removing rust, old paint, corrosion, and most coatings. It can also be used for preparing metals for a primer or powder coating.

ADVANTAGES:

1. Free of crystalline-silica.
2. Inert, non-flammable, non-corrosive, non-fibrogenic, and contains no ingredients which are harmful to the environment.
3. Provides superior cutting power for removing rust and most coatings.
4. Excellent for use on steel, aluminum, concrete or wood.
5. Gives more product per pound due to lower bulk density, while still providing excellent cutting power.
6. Can be re-used.

TECHNICAL DATA:

1. Available in four grit sizes:
 - General Purpose
 - Coarse
 - Fine
 - Extra Fine
2. Must be stored in a dry location

PACKAGING: ENVIRO-GRIT is packaged in a 22.7 kg (50 lb.) paper bags, with 63 bags per pallet. Bulk packaging is available upon request.

Liability for damages or defective goods shall be limited to the refund of the purchase price or product replacement.
