

DESCRIPTION: MASONRY CLEANER is a blend of acids and chemicals to clean masonry in one step. MASONRY CLEANER will also remove unwanted mortar.

USES: MASONRY CLEANER:

- Removes efflorescence from masonry
- Cleans coloured brick without burning colour
- Eliminates lime staining from masonry
- Cleans granite, marble and terrazzo floors

ADVANTAGES: MASONRY CLEANER is a multi-purpose, easy to use, one operation cleaner.

PROCEDURES:

Masonry Cleaning:

1. Saturate surface to be cleaned with water.
2. Apply diluted solution of 1 part MASONRY CLEANER to 5 parts clean water.
Note: Add MASONRY CLEANER to water, do not add water to MASONRY CLEANER.
3. Brush surface after solution has had a few minutes to react.
4. Rinse thoroughly with clean water.

Mortar Removal:

1. Dampen application area.
Apply as is or dilute in up to 3 volumes of water. Note: Add MASONRY CLEANER to water; do not add water to MASONRY CLEANER.
2. Agitate the surface with a stiff broom or brush.
3. After scrubbing let surface stand for 15 to 20 minutes before rinsing thoroughly with clean water. If surface dries, re-mist and re-brush.

TECHNICAL DATA: The data outlined below is representative of typical values achievable under controlled laboratory conditions. Results obtained in the field may vary from those stated.

COVERAGE:
MASONRY CLEANER will cover approximately 2.5 square metres (100 ft² / US gal) depending on surface texture.

PROPERTIES OF MATERIAL:

Appearance	Red clear liquid *
pH	1.0 (acidic)
Specific Gravity	1.128 kg/litre
Bulk Density	1.128 kg/litre (9.4 lb./gal)

* MASONRY CLEANER has a red fugitive dye to assist the applicator in coverage.
