

DESCRIPTION: WHITE CEMENT is a true Type GU Portland Cement that conforms to CSA Standard A5. WHITE CEMENT is manufactured with specially selected raw materials so that it will have negligible amounts of iron and manganese, the two minerals that make normal Type GU cement a gray colour. Yet, WHITE CEMENT meets all the technical requirements of a normal Type GU cement and will satisfy low alkali requirements.

USES: WHITE CEMENT is ideal for architectural construction or structural concrete where a lighter or brighter colour is required for aesthetic or safety reasons.

APPLICATIONS: WHITE CEMENT's applications include:

- colored concrete
- tilt-up panel construction
- stucco
- highway median barriers
- colored masonry units and mortar
- cement paint
- tile grout
- swimming pools
- terrazzo surfaces
- precast curtain walls and facing panels

TECHNICAL DATA: WHITE CEMENT meets CSA Standard A5

PACKAGING: WHITE CEMENT is packaged in 40 kg (88 lb.) triple-lined paper bags.

All Basalite Dry mix can be custom-packaged to suit specific project requirements.

SAFETY PRECAUTIONS: WHITE CEMENT contains Portland cement. Normal safety wear such as rubber gloves, dust masks and safety glasses, used to handle conventional cement-based products, should be worn. Material Safety Data Sheets are available upon request.

Liability for damages or defective goods shall be limited to the refund of the purchase price or product replacement.
